Independent auditor's report on Review of Interim Financial Information

To the
Management, Board of Directors and Shareholders of
Rumo S.A.
Curitiba - PR

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Rumo S.A. ("Company"), included in the Quarterly Information Form - ITR for the quarter ended March 31, 2017, which comprise the balance sheet as of March 31, 2017, the statements of profit or loss, other comprehensive income, changes in equity and cash flows for the three-month period then ended, and explanatory notes.

Company's management is responsible for the preparation of these interim financial information in accordance with the Technical Pronouncement CPC 21 (R1) - *Demonstração Intermediária* and the international financial reporting standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of the information in accordance with the standards issued by *Comissão de Valores Mobiliários*, applicable to the preparation of Quarterly Information - ITR. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International standards on review of interim financial information (NBC TR 2410 - *Revisão de Informações Intermediárias Executada pelo Auditor da Entidade* and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information included in the quarterly information referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 issued by IASB, applicable to the preparation of the Quarterly Information - ITR and presented in accordance with the standards issued by *Comissão de Valores Mobiliários*.

Other matters - Statements of value added

The individual and consolidated interim financial information related to the Statements of value added (DVA) for the three-month period ended March 31, 2017, prepared under the responsibility of the Company's management, presented herein as supplementary information for IAS 34 purposes, have been subject to review procedures jointly performed with the review of the Company's interim financial information – ITR. In order to form our conclusion, we assessed whether those statements are reconciled with the interim financial information and accounting records, as applicable, and whether their format and contents are in accordance with criteria determined in the Technical Pronouncement CPC 09 – *Demonstração do valor adicionado*. Based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the overall individual and consolidated interim financial information.

1 Operations

Rumo S.A. ("The Company" or "Rumo"), is a publicly traded company with its shares traded on the São Paulo stock exchange ("BM&FBOVESPA") under the code RAIL3, and has its headquarters in the city of Curitiba, State of Paraná, Brazil. The Company is a direct subsidiary of Cosan Logística S.A. ("Cosan Logística"), which owns 28.37% of its capital.

The Company is a service provider in the logistics sector (transport and elevation), principally for export commodities, providing an integrated transport solution, handling, storage and shipment from the production centers to the main southern and southeast ports, and also holds interests in other companies and ventures related to infrastructure.

The Company operates in the rail transportation segment in Southern Brazil through its subsidiary Rumo Malha Sul S.A. ("Rumo Malha Sul"), and the Midwest region and State of São Paulo through subsidiaries Rumo Malha Paulista S.A. ("Rumo Malha Paulista"), Rumo Malha Norte S.A. ("Rumo Malha Norte") and Rumo Malha Oeste S.A. ("Rumo Malha Oeste"). In addition, the subsidiary Brado Logística e Participações S.A. ("Brado") operates in the container segment while Elevações Portuárias S.A. ("Elevações Portuárias") has terminals for transshipment and terminals for export of sugar and grains in the Port of Santos.

On December 19, 2016, Rumo Logística Operadora Multimodal S.A. ("Rumo Logística") and the Company approved the operation of Incorporation of Rumo Logística by the Company ("Incorporation"), pursuant to the "Protocol and Justification of Incorporation". The accounting operation incurred on December 31, 2016 and consisted of the corporate reorganization through the reverse incorporation of Rumo Logística by the Company and consequent extinction of the first, with succession of all its assets, rights and obligations by the Company, under the terms of Articles 224 to 227 of 6,404/76 ("Brazilian Corporation Law"). In addition, following the event described in the previous paragraph, the Company contributed the assets and liabilities related to the port operations that previously occurred in the direct subsidiary Rumo Logística into the new indirect subsidiary of the segment, Elevações Portuárias through capital increase amounting R\$672,396. Additionally, the Company contributed assets (rail cars and locomotives) amounting R\$895,727 in the indirect subsidiary Rumo Malha Norte.

On February 23, 2017, TPG VI Fundo de Investimento em Participações ("TPG"), shareholder of the Company, exercised its right to substitute 12,831,102 shares issued by the Company - all of its shares related to the Company's shareholders' agreement, celebrated by Cosan S.A. Indústria e Comércio ("Cosan"), Cosan Logística, GIF Rumo Fundo de Investimento em Participações ("GIF"), TPG and Cosan Limited ("CZZ") on 2010, as amended ("Shareholders' Agreement"), for shares issued by Cosan and shares issued by Cosan Logística, with settlement as agreed between the shareholders. After settlement of the substitution obligations, the Shareholders' Agreement will automatically terminate.

Notes to the interim financial statements

(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

On March 7, 2017, in compliance with Instruction No. 358 of the Brazilian Securities Commission of January 3, 2002, the Company approved at the Extraordinary General Meeting held on December 19, 2016, the replacement of each common share issued by Rumo Logística by one share issued by the Company. Beginning on March 13, 2017, which was made in connection with the incorporation of Rumo Logística by the Company. The Company started trading with the common shares issued by the Company under the code RAIL3 and name of the Company RUMO S.A. listed by BMF&BOVESPA in its special segment of the “Novo Mercado”.

Management has made an assessment of the entity’s ability to continue operating in the foreseeable future. On March 31, 2017, the Company had a consolidated working capital of R\$600,678 and a consolidated loss of R\$248,597. In addition, its generated consolidated operating cash flow of R\$546,426 and made investments in modernizing its rolling stock and improving the railway network of R\$471,883, in line with its business plan. The capital increase plus the debt reprofiling implemented in 2016, as well as the issue of Senior Notes 2024 in 2017 (note 12), fully equated the risk of the Company's operational continuity.

The consolidated financial position and results of operations of the Company for the current period and for the periods subsequent to this reorganization are not necessarily comparable with the information presented in previous periods.

a) The concession of railway operation and port terminal

The Company holds, through subsidiaries or affiliates, concession of railway services and port terminals, whose scope and concession terms are as follows:

Companies	Concession end	Coverage areas
<i>Subsidiaries</i>		
Elevações Portuárias	March 2036	Port of Santos-SP
Rumo Malha Paulista	December 2028	São Paulo State
Rumo Malha Sul	February 2027	South and São Paulo State
Rumo Malha Oeste	June 2026	Midwest and São Paulo State
Rumo Malha Norte	May 2079	Midwest and São Paulo State
Portofer	June 2025	Port of Santos-SP
<i>Associates</i>		
Terminal XXXIX	October 2025	Port of Santos-SP
TGG - Terminal de Granéis do Guarujá	August 2027	Port of Santos-SP
Termag - Terminal Marítimo de Guarujá	August 2027	Port of Santos-SP

The subsidiaries and associates above are subject to compliance with certain conditions set out in the privatization bids and the concession contracts of railway networks and port terminals. To the extent that there is no substantive control to which the service should be provided and as there is no substantive pricing control, IFRIC 12 / ICPC 01 is not applicable to the Company and therefore the assets acquired by it are treated under IAS 17 / CPC 27 – Property and Equipment.

The concession agreements of these subsidiaries and associates shall be terminated by: expiration of the contractual term; expropriation; forfeiture; termination; annulment and bankruptcy; or termination of the concessionaire.

Rumo S.A.

Notes to the interim financial statements

(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

In the event of termination of any of the concessions, the main effects would be as follows:

- Return to the government all the rights and privileges transferred to the subsidiaries, together with leased assets and those resulting from investments that are considered reversible by the Federal Government as being necessary to the continuous provision of the granted service.
- The reversible assets would be indemnified by the Federal Government at the residual cost, calculated based on the accounting records of the subsidiaries, considering depreciation; such costs would be subject to technical and financial analysis by the Federal Government. Any and all improvements made to the permanent track superstructure would not be considered as investments for indemnification purposes.

2 Basis of preparation and significant accounting policies

2.1 Statement of compliance

The individual and consolidated interim financial statements have been prepared in accordance with CPC 21 (R1) - Interim Financial Reporting and the International Accounting Standard IAS 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB), and are presented in accordance with the rules of the Brazilian Securities and Exchange Commission (CVM) applicable to the preparation of the Quarterly information (ITR) and do not include all the information required in the annual financial statements.

These interim financial statements have been prepared following the basis of preparation and accounting policies consistent with those adopted in the preparation of the financial statements of December 31, 2016 and should be read together. The information notes that no significant changes were not repeated in full in these financial statements. All relevant information from financial statements is being evidenced, and these correspond to those used by the Board in its management.

On May 04, 2017, the Board of Directors authorized the issuance of the financial statements.

2.2 Presentation of Information by segment

Operating segment information is presented consistently with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, responsible for allocating resources and assessing performance of the operating segments is the Executive Board, also responsible for making the strategic decisions of the Company and its subsidiaries.

Rumo S.A.

Notes to the interim financial statements

(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

The Management are structured on two vice presidents, the first focused on South operations (comprised of railway and transshipment in the concession area of Rumo Malha Sul and Rumo Malha Oeste) and the second focused on the North operations (composed by railway operations, road operations, transshipment and port elevation in the areas of the Company's concession of Rumo Malha Norte and Rumo Malha Paulista). A third segment includes Brado, the Company's indirect subsidiary, focused on container operations and the container operations of other group companies. Therefore, the Company now discloses three segments: (i) Northern Operations, (ii) South Operations, and (iii) Container Operations.

2.3 Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries listed below:

Investment in associates (equity of investees)

Associates are those entities in which the Company has significant influence but not control or joint control over their financial and operating policies. Significant influence supposedly occurs when the Company, directly or indirectly, holds between 20% and 50% of the voting power of the entity.

Rumo S.A.

Notes to the interim financial statements

(Amounts in thousands of Brazilian Reals – R\$, unless otherwise stated)

The following associates are accounted for under the equity method:

	<u>Directly and indirectly</u>	
	<u>March 31,</u> <u>2017</u>	<u>December 31,</u> <u>2016</u>
Associates (Equity)		
Rhall Terminais Ltda.	30.00%	30.00%

TGG S.A. (i)	9.92%	9.92%
Terminal XXXIX S.A.	49.62%	49.62%

- (i) For these associates a conclusion about the existence of significant influence arises from the Company's representative to participate in the affiliate's board.

Investments in associates are accounted for using the equity method and are initially recorded at cost. The investment costs include the costs of transaction.

Under the equity method, the portion attributable to the Company on the net income or loss for the year of these investments is recorded in the statement of income under "Equity in subsidiaries and associates". All intra-group balances, revenues and expenses and unrealized gains and losses arising from intra-group transactions are fully eliminated. Other comprehensive income of subsidiaries is recorded directly in the Company's equity under "Other comprehensive income".

2.4 Statement of value added

The Company prepared statements of value added (DVA) in accordance with CPC 09 - Statement of Added Value, which are presented as an integral part of these financial statements in accordance with accounting practices adopted in Brazil applicable to public companies, while for IFRS they represent supplementary financial information.

2.5 Cash Flow – non cash transactions

The Company presents its statement of cash flows using the indirect method.

During the period ended March 31, 2017, the Company made the following transaction not involving cash and therefore is not reflected in the consolidated statement of cash flows:

- Lease of locomotives, rail cars and other assets through operation accounted characterized as capital leases in the amount of R\$1,732.

2.6 New standards and interpretations not yet effective

- *IFRS 9 Financial Instruments*

We have identified a change in the policy for the provision for doubtful accounts and we have started a study on the possible impacts, without conclusion to date.

Rumo S.A.

Notes to the interim financial statements

(Amounts in thousands of Brazilian Reals – R\$, unless otherwise stated)

- *IFRS 15 Revenue from Contracts with Customers*

The standard is applicable for years beginning on or after January 1, 2018, but we do not expect material adjustments in revenue recognition. We continue to evaluate possible impacts of IFRS 15 on the disclosures in explanatory notes and in the policies applied in the control of revenue.

- *IFRS 16 Leasing (Leases)*

The Company began an initial assessment of the potential impact on its financial statements. So far, the most significant impact is that the Company will recognize new assets and liabilities for its operating leases of assets related to concessions.

The Company has not yet quantified the impact of adopting IFRS 16 on its assets and liabilities. The quantitative effect of the adoption of IFRS 16 will depend specifically on the transition method chosen, the use of practical files and recognition exemptions, and any additional leases that the Company will enter into. The Company expects to disclose its transition approach and quantitative information prior to adoption.

There are no other IFRS standards or IFRIC interpretations that have not come into effect and are expected to have a material impact on the Company.

Senior Notes 2024

On February 9, 2017, through its subsidiary, Rumo Luxembourg Sarl ("Rumo Luxembourg"), the Company issued debt securities in the international market, Senior Notes due 2024 ("Notes 2024") in the total amount of US\$750,000, with maturity in February 2024 and interest of 7.375% per annum, paid semi-annually.

The 2024 Notes were rated BB- by the rating agencies Standard & Poor's and Fitch Ratings. The Company will use the net proceeds from this funding for early settlement of debt as part of the Company's capital structure management process, with one of the objectives being to diversify the sources of financing of the Company's investment plan.

Unused credit lines

At March 31, 2017, the Company and its subsidiaries had lines of credit for financing from BNDES, which were not used, totaling of R\$553,190 (R\$541,639 on December 31, 2016).

Notes to the interim financial statements

(Amounts in thousands of Brazilian Reais – R\$, unless otherwise stated)

Covenants

The Company is subject to certain restrictive contractual clauses, relating to the level of leverage and debt service coverage, in some of its contracts. The more restrictive provisions have yearly verification at year-end and refer to net comprehensive indebtedness. Net comprehensive indebtedness includes bank debts, debentures, commercial leases, Real Estate Receivables Certificates and derivative instruments linked to credit operations, deducted from securities, as well as cash and cash equivalents. As of 12/31/2017 the covenants were defined for a maximum leverage of 4.3x (net comprehensive debt / EBITDA LTM) and minimum interest coverage ratio of 1.4x EBITDA / Financial Result.

The Company also has quarterly inspections of certain indices that consist of: (i) consolidated net banking debt / EBITDA (earnings before interest, taxes, depreciation and amortization, in Portuguese); (ii) EBITDA / consolidated financial result (only interest on debentures, loans / financing and derivative operations are considered). Net bank debt includes bank debt, as well as securities and derivative instruments linked to credit operations. The agreed ratio is up to 5.5x net banking debt / EBITDA and minimum interest coverage ratio of 2.0x EBITDA / financial result, limits that were being met by the Company on March 31, 2017.

On March 31, 2017, the Company did not have loans with the BNDES subject to covenants. This requirement has been replaced by bank guarantees.

Amounts under judicial discussion

The Company is challenging in court the economic and financial unbalance of certain leases and concession contracts.

In April 2004, Rumo Malha Paulista filed an interlocutory injunction and subsequently a Declaratory Action before the 21th Federal Court of Rio de Janeiro questioning the economic and financial unbalance of the Lease and Concession Agreements, due to the high disbursement incurred by the Company for the payment of labor judicial proceedings and other expenses involved, which are the responsibility of Rede Ferroviária Federal S.A., as expressed in the bidding documents.

Rumo Malha Paulista required an injunction to suspend payment of installments of the concession and lease agreements, due and falling, and to offset the credit balance resulting from labor amounts paid by the Company with the amount charged by the Union. In April 2005, the injunction was granted, suspending the enforceability of installments for 90 days by determining the completion of expertise. In July 2005, the suspension was extended for another 90 days. In September 2005, the injunction was overturned by the Federal Court of Rio de Janeiro. In January 2006, the suspension of payment of installments was granted, by means of judicial deposit. The amount related to the lease installments was being deposited in court until October 2007, when the Company obtained a court order to replace the judicial deposits for bank guarantee. In October 2015 decision was handed down that partially upheld the action recognizing the occurrence of economic and financial unbalance of the agreements, allowing the Company to perform the part of compensation of the amounts claimed in the match against presented debt. Nevertheless, the Company believes that all amounts discussed shall be offset against payables based in clauses 7 and 10 of the bidding documents.

Management, supported by the opinion of its legal counsel, assesses the chances of success as probable regarding the value of the award granted and as possible in relation to the severance payments, but maintains the registration of the debt because it is a contractual obligation.

Rumo S.A.

Rumo Malha Oeste also claims the reestablishment of the economic-financial balance, lost by the cancellation of transportation contracts existing at the time of privatization, change in the regulatory environment and conditions set forth in the Privatization Tender; additionally, the growth forecasts that defined the value of the business did not materialize. The lawsuit is filed with the 16th Federal Court of Rio de Janeiro. To proceed with the legal discussion the Company offered government securities (Treasury Bills - LFT) as an execution guarantee. In March 2008, the Company was authorized to replace the guarantee with a bank guarantee and in May 2008 the Company redeemed the treasury bills. In December 2014, a decision was handed down that upheld the action recognizing the occurrence of economic and financial balance of the contracts, pending now the expert measurement of the amount of balance and related aspects. In December 2015 the claim for replacement of guarantee letters presented by the Company with an insurance policy was accepted.

Management, supported by the opinion of its legal counsel, assesses the chances of success as probable, but the financial liability remains recognized as it is a contractual obligation not yet discharged and because the balance still depends offsetting with the Company's reimbursement rights.

Judicial deposits at March 31, 2017 concerning the above claims totaled:

	<u>March 31, 2017</u>
Malha Paulista	118,820
Malha Oeste	<u>19,940</u>
	<u><u>138,760</u></u>

Judicial deposits are recorded in the line "regulatory" under Note 16.

21 Earnings per share

Basic earnings per share are calculated by dividing the loss by the weighted average number of common shares outstanding during the period. Diluted earnings per share are calculated by adjusting the income and number of shares for the impacts of potentially dilutive instruments.

The table below shows the calculation of earnings per share (in thousands, except per share amounts) for the periods ended March 31, 2017 and 2016:

Basic and diluted

Weighted average number of common share	1,339,016	1,022,047
Basic and diluted loss per ordinary share	<u>(R\$0.1861)</u>	<u>(R\$0.2698)</u>

Antidilutive instruments

The non-controlling interest of the indirect subsidiary Brado have the right to exercise a Liquidity option provided for in the shareholders' agreement signed on August 05, 2013. This option would exchange all Brado shares held by such minority shareholders by shares of the Company. The exchange ratio shall take into account the economic value for both Brado and the Company shares. At the Company's exclusive discretion, an equivalent cash payment is also possible.

22 Stock option plan

2016 Plan

On December 21, 2016, a new share-based compensation model was approved at the Shareholders' Meeting, which became effective as of the granting, on January 2, 2017.

1,513,180 shares of the Stock-Based Remuneration Plan were issued, which will be transferred in full and free of charge after 5 years, from the approval of the grant, in a quantity adjusted by the number proportional to the dividends paid in the period, conditioned to the exercise of the functions of the beneficiary in the Company, under the terms of each Share granting Program.

The Black and Scholes methodology was used to calculate the fair value of the shares granted under the terms of the Stock-Based Compensation Plan, reflecting the determination of Technical Pronouncement CPC 10 - Share-based Payment. Given the characteristics of the Plan, the fair value is equivalent to the value of the share on the grant date (R\$6.10).

2015 Program

On October 2, 2015, the Board of Directors approved the creation of the Stock Option Plan or Share Subscription - Year 2015 Calendar.

A total of 4,485,238 options were granted at an exercise price of R\$6.30 (to be corrected by the IPCA until the exercise date). This plan has a vesting period only 5 years and can exercise the options be done between October 1, 2020 and 2022. The fair value of the options was estimated at R\$2.83 using the Black and Scholes model.

The Options under the Stock Option Plan granted in 2015 were replaced by 1,517,143 shares based on the Stock-Based Remuneration Program (additional to the 2016 program), granted on January 2, 2017, which will be delivered to the end of the original program (September 2020).

Previous plan (ALL old plan)

With the acquisition of Rumo by Rumo Logística, the stock option plan based on their existing stock was canceled and assumed by Rumo Logística. With that the fair value of the existing options assumed by Rumo was recalculated on the date of the acquisition on April 1, 2015. The total of 1,478,659 options were assumed by Rumo to fair value per option R\$0.18 calculated by the binomial method.

The amount of R\$1,905 was recognized as an expense in the period ended March 31, 2017 (R\$ 635 on March 31, 2016) related to the appropriation of the 2015 and 2016 programs. There were no cancellations and exercises in the period.

Structure of risk management

Management is responsible for establishing and overseeing the Company's risk management framework. The Board of Directors follows the Risk Management through the Company's senior management reporting, which is responsible for developing and monitoring risk management policies.

Risk management policies are established to identify and analyze the risks to which the Company is exposed to define limits of appropriate risks and controls, and to monitor risks and adherence to defined limits. Risk management policies are reviewed regularly to reflect changes in market conditions and the Company's activities. Management through its standards and training procedures and management seek to maintain a discipline and control environment in which all employees are aware of their duties and obligations.

The Audit Committee oversees how management monitors compliance with policies and risk management procedures and reviews the adequacy of the risk management framework in relation to the risks to which the Company is exposed. The Audit Committee is supported by the internal audit team in carrying out its functions. The internal audit performs regular and sporadic revisions in policies and risk management procedures and the result of the following is reported to the Audit Committee.

All derivative activities for risk management purposes are carried out by specialized teams with the skills, experience and appropriate supervision. It is the Company's policy not to engage in any derivative transactions for speculative purposes.

The use of financial instruments for the purpose of protection is done through an analysis of the risk exposure that management intends to cover.

On March 31, 2017 and December 31, 2016, the fair values related to transactions involving derivative financial instruments to hedge risk exposure of the Company are presented next:

- (i) The risk of customer credit is managed centrally by each business segment, subject to the procedures, controls and policy established by the Company in relation to this risk. Credit limits are established for all customers based on internal rating criteria. Customer credit quality is evaluated based on an internal procedure of extensive credit rating. The outstanding customer receivables are monitored frequently. The need for a valuation allowance for impairment is analyzed at each reporting date on an individual basis for major clients. In addition, a large number of receivables with smaller balances are grouped into homogenous groups and in such cases; the recoverable loss is assessed collectively. The calculations are based on actual historical data.
- (ii) The risk of credit balances with banks and financial institutions is managed by the Company's treasury in accordance with the policy established by. Excess funds are invested only with approved counterparties and within the limits assigned to each. The counterparty credit limit is reviewed annually and may be updated throughout the year. These limits are designed to minimize the concentration of risks and therefore mitigate financial loss in the event of a potential failure of counterparty. The maximum the Company's exposure to credit risk in relation to the balance sheet components as of March 31, 2017 and December 31, 2016 is the value recorded, as shown in Note 13 except for financial guarantees and derivative financial instruments. The maximum exposure with respect to financial guarantees and derivative financial instruments is presented in the liquidity table below.

The credit risk on cash and cash equivalents, marketable securities are determined by rating instruments widely accrued by the market and are arranged as follows:

	March 31, 2017
AAA	438,920
AA+	541,897
AA	2,377,310
At March 31, 2017	<u>3,358,127</u>

(b) Liquidity risk

Liquidity risk is the risk that the Company and its subsidiaries encounter difficulties in meeting the obligations associated with its financial liabilities that are settled with cash payments or other financial assets. The Company's approach and its subsidiaries to managing liquidity is to ensure, as much as possible, there is always a sufficient liquidity to meet the obligations falling due under normal and stress conditions, without causing unacceptable losses or risk damaging the reputation of the Company and its subsidiaries.

The non-derivative financial liabilities of the Company sorted by due dates (based on undiscounted cash flows contracted) are as follows:

The average term of these operations, which are recorded at their present values at the interest rate previously mentioned, is three months.

(c) Market risk

Market risk is the risk that changes in market prices - such as exchange rates and interest rates - will affect the Company's earnings or the value of its holdings of financial instruments. The objective of market risk management is to manage and control exposures to market risks within acceptable parameters, while improving the return.

The Company uses derivatives to manage market risks. All these operations are conducted within the guidelines established by the risk management policy. Generally, the Company seeks to apply hedge accounting to manage the volatility in the result.

• Foreign exchange risk

On March 31, 2017 and December 31, 2016, the Company and its subsidiaries had the following net exposure to exchange rates on assets and liabilities denominated in US Dollars:

Sensitivity analysis of changes in exchange rates:

The probable scenario was defined based on the U.S. Dollar market rates as at March 31, 2017, which determines the fair values of the derivatives at that date. Stressed scenarios (positive and negative effects, before tax effects) were defined based on changes of a 25% and 50% to the U.S. Dollar exchange rates used in the probable scenario.

Based on the financial instruments denominated in U.S. Dollars at March 31, 2017, the Company performed a sensitivity analysis by increasing and decreasing the exchange rate for R\$/US\$ by 25% and 50%. The probable scenario considers the estimated exchange rates at the due date of the transactions for the companies with functional currency Real (positive and negative, before tax effects), as follows:

	Exchange rate sensitivity analysis (R\$/US\$)					
	March 31, 2017	Probable	25%	50%	-25%	Scenarios -50%
US Dollars	3.1684	3.3300	4.1625	4.9950	2.4975	1.6650

The external source used by the Company for market projections is Consultoria Tendências.

Given the above scenario, the gains and losses would be affected as follows:

Instrument	Risk factor	Scenarios				
		Probable	25%	50%	-25%	-50%
Cash and cash equivalents	USD fluctuation	121,223	745,716	1,370,209	(503,270)	(1,127,763)
Derivative financial instruments (notional)	USD fluctuation	559,992	175,700	322,838	(118,577)	(265,715)
Long-term debt	USD fluctuation	(125,803)	(773,894)	(1,421,984)	522,287	1,170,377
Impacts on profit or loss		555,412	147,522	271,063	(99,560)	(223,101)

• Interest rate risk

The Company and its subsidiaries monitor fluctuations in variable interest rates tied to some debts, mainly those linked to the risk of CDI/TJLP, and makes use of derivative instruments in order to minimize these risks.

Sensitivity analysis of changes in interest rates:

The sensitivity analysis on interest rates on loans and financing and compensation for CDI of financial investments increase and decrease of 25% and 50% is as follows:

Exposure interest rate ⁽ⁱ⁾	March 31, 2017				
	Balance	25%	50%	-25%	-50%
Cash and cash equivalents, Marketable securities and Restricted cash	84,854	21,213	42,427	(21,213)	(42,427)

Fair value of financial instruments

The fair value of financial assets and liabilities represents the amount at which the instrument could be exchanged in a current transaction between willing parties, and not in a forced sale or liquidation. The following methods and assumptions were used to estimate the fair value:

- The Cash and cash equivalents, accounts receivable, accounts payable and other short-term liabilities approximate their carrying amount largely due to the short-term maturity of these instruments.
- The fair value of bonds and marketable bonds is based on price quotations at the balance sheet date. The fair value of non-negotiable instruments, bank loans and other financial debts, obligations under finance leases as well as other non-current financial liabilities is estimated by means of future cash flows discounted using rates currently available for debt or deadlines and the like remaining.
- The market value of the Senior Notes Due 2024 is listed on the Luxembourg Stock Exchange is based on their quoted market price as of March 31, 2017, of 103.22% of the face nominal value. The fair value of other loans and financing, the respective market values substantially approximate the amounts recorded due to the fact that these financial instruments are subject to variable interest rates, see details in note 12.

The Company and its subsidiaries enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings.

The fair value of derivative financial instruments is determined using valuation techniques and observable market data such as quoted prices in active markets or discounted flows based on market curves. The most commonly used valuation techniques include fixed rate pricing models and swaps, with present value calculations. The models consider various data, including counterparty credit quality, spot and forward exchange rates, interest rate curves.

The carrying amounts and fair values of financial assets and liabilities are as follows:

EARNINGS RELEASE 1Q17

São Paulo, May 10, 2017 – RUMO S/A (*BM&FBovespa: RAIL3*) (“Rumo”) and COSAN LOGÍSTICA S.A. (*BM&FBovespa: RLOG3*) (“Cosan Logística”) today announce its results for the first quarter of 2017 (1Q17). The results are consolidated in accordance with the accounting criteria adopted in Brazil and the International Financial Reporting Standards (IFRS).

Rumo Highlights in 1Q17

- EBITDA reached R\$493 million in 1Q17, up 11% from 1Q16, mainly due to efficiency gains (variable costs reduction and fixed costs + selling, general and administrative expenses increase below inflation) deriving from investments made, thus, leading to expansion of the EBITDA margin.
- Total volume transported reached 10 billion RTK, in line with the strong comparison basis of 1Q16, when there was an unusual demand for corn transportation.
- A total of 2.5 million tons were loaded at Rumo’s terminals at the Port of Santos (SP) in 1Q17. The 12% decrease reflects higher sugar shipments in the second and third quarters of 2016.
- CAPEX totaled R\$472 million in 1Q17 focused on capacity expansion initiatives, as assets acquisition and rail stretches revamp, in line with the investment plan.

1. Executive Summary of 1Q17

Rumo's EBITDA was up 10.8% to R\$493 million in 1T17 year-on-year. Even though the unusual demand for corn transportation in 1Q16 was not seen again in 1Q17, Rumo recorded EBITDA growth as a result of implementation of the investment plan. Variable costs decreased and fixed costs added to selling, general and administrative expenses increased below inflation, on top of tariff contractual adjustments. As a result, EBITDA margin climbed from 38% in 1Q16 to 41% in 1Q17.

Volume transported in 1Q17 came in line with the same period last year, recording 10 billion RTK. The year-on-year comparison was very strong for the period due to the unusual demand for corn transportation in January 2016, as a function of 2015 strong crop. In addition, soybean crop shipments were concentrated in February and March that year, making the Company to operate at the limit of its capacity. In 2017, however, there was no demand for corn transportation, due to the 2016 second crop shortfall, and soybean transportation only started in February. Even so, with increased capacity, in 1Q17 Rumo recorded almost the same total volume transported in 1Q16.

Rumo gained market share on grain transportation to the Port of Santos (+6 p.p.) in 1Q17. Grain exports in January 2017 maintained the historical trend, therefore, below the volume seen in 2016. The months of February and March revealed a demand similar to the same period last year. Increased transportation capacity generated by the investments allowed market share gain in these two months, offsetting lower demand seen in January.

Rumo Market Share Evolution at the Port of Santos (SP)
(millions of tons and %)

Net loss in 1Q17 was R\$248.6 million and leverage as measured by broad net debt/EBITDA LTM reached 4.4 times. Despite EBITDA growth, higher financial expenses, due to higher debt costs as a result of debt reschedule process, and higher depreciation and amortization resulted in net loss in the quarter. Leverage in the quarter came in line with 4Q16.

In 1Q17, Rumo issued bonds in the international market totaling US\$750 million with maturity in February 2024 and 7.375% annual interest rates. The use of proceeds is part of a liability management and liquidity increase plan, in addition to the constitution of guarantees necessary to access BNDES credit lines, for which Rumo's projects were previously classified as eligible.

Expectation for the upcoming quarters remains positive, especially referring to soybean and corn crops. The soybean harvest already confirmed a substantial volume of product for transportation this year, while corn planting happened at a favorable period for productivity. Recent projections of soybean and corn crops are shown in the graphs below.

Total volume transported in the North Operation was 7.1 billion RTK in 1Q17, up 0.9% year-on-year. This increase is due to the growth of industrial products transportation, as well as the flat volume of agricultural products in line with 1Q16.

The transportation of agricultural products came to 6.4 billion RTK in 1Q17. The investments made in 2016 resulted in capacity increase, thus, allowing the capture of higher volumes in February and March 2017, offsetting lower demand for transportation in January (interharvest period). 1Q16 represents a strong basis of comparison, since January was marked by an unusual corn volume transported, deriving from 2015 strong crop. In addition, the commercial strategy consolidation sustained Rumo's higher market share in grain transportation to the Port of Santos (SP), which increased from 42% in 1Q16 to 48% in 1Q17. Sugar transportation declined due to the priority given to grains, besides higher volumes transported in early 2016 resulting in lower volumes in 1Q17.

Transportation of industrial products increased 18.7% in 1Q17 to 626 million RTK. This quarterly result is due to higher fuel transportation. The anticipated harvest of the record soybean crop demanded higher diesel consumption from agricultural machinery, leading to higher demand for fuel transportation in the Mid-West region.

Port loading volume was 2.5 million tons in 1Q17, down 12.4% from 1Q16. Such decrease reflects a scenario of higher sugar shipments during second and third quarters of 2016.

Note 4: Includes revenue from the right of way of other railways, revenue from sugar transportation using other railways or road transportation and revenue from volumes contracted but not executed according to commercial agreements (take or pay).

Net revenue from North Operation totaled R\$914.2 million in 1Q17, up 2.0% from 1Q16. Such increase is chiefly due to higher tariffs practiced in transportation and port loading, as well as higher industrial volumes transported.

The cost of services provided totaled R\$552.4 million in the quarter, up 8.3% from 1Q16. Variable costs decreased 11.4% to R\$195.4 million, mainly due to: (i) higher efficiency of new locomotives acquired, resulting in lower fuel consumption (liters/GTK: -7.0%) and (ii) higher utilization of own fleet in comparison with road transportation and other railways, which contributed to reduce freight cost with third parties. Fixed costs totaled

R\$175.9 million in 1Q17, up 12.5% from 1Q16, mainly due to outsourcing and advisory services contracted for operational efficiency projects. Depreciation and amortization also increased in 1Q17, due to higher investments made over the last two years.

EBITDA reached R\$501.0 million in 1Q17, up 6.2% from 1Q16. This result was benefited by efficiency gains generated from investments made, in addition to higher average yield deriving from inflation and diesel contractual adjustments.

The South Operation transported a total volume of 2.6 billion RTK in 1Q17, down 0.8% from 1Q16. 1Q17 results reflect lower agricultural volumes, mainly due to corn not transported in 1Q17 in view of 2016 crop shortfall which was partially offset by higher industrial volumes transported.

The volume of agricultural products fell 4.6% to 1.8 billion RTK in 1Q17, due to lower corn volumes transported compared to the atypical scenario in 1Q16. The quarterly result was partially offset by higher capacity, which allowed to capture higher soybean volumes in February and March. Besides that, additional volumes of fertilizers and wheat contributed to results in the period.

Transportation of industrial products increased 8.4% to 827 million RTK in the quarter. In 1Q17 pulp volume grew 42.2%, due to supply made to Klabin's new plant in Ortigueira, Paraná. Fuel volume dropped 9.1%, due to the change in Petrobras' pricing policy which privileged marketplaces outside Rumo's influence area.

Note 5: Includes revenue from volumes contracted and not executed according to commercial agreements (take or pay).

Net revenue from the South Operation amounted to R\$237.1 million in 1Q17, up 5.4% from 1Q16. Increase in the quarter was mainly due to higher industrial volumes transported. In addition, increase in the average yield practiced in the quarter, deriving from contractual adjustments, contributed to such result.

In 1Q17, cost of services provided increased 9.3% to R\$306.9 million. Variable costs went down 7.8% to 62.4 million due to higher efficiency in fuel consumption of new locomotives (liters/GTK: -5.1%). Fixed costs totaled R\$153.9 million, in line with 2016.

EBITDA from the South Operation was R\$2.3 million in 1Q17. EBITDA growth compared to 1Q16 is mainly due to the cost-saving efforts, higher industrial products transported and higher tariffs practiced in the period.

Average Yield (R\$ '000/containers)	2,5	2,7	-8.3%
Total Volume (millions RTK)	348	445	-21.8%

Volume of containers transported decreased by 13.8% in 1Q17 to 13.6 thousand containers. In 1Q17, volume was mainly impacted by rationalization of non-profitable routes, especially in the Rio Grande do Sul and Mercosur corridors. In addition, demand for refrigerated products transportation dropped in the period.

EBITDA Margin (%)	-22.2%	-22.1%	-0.1 p.p.

Note 6: Includes revenue from service units.

In the quarter, net revenue fell by 26.4% to R\$47.9 million. The lower volume of containers handled (-13.8%) and lower average yield (-8.3%) practiced in the period, due to the mix of transported products, contributed to such quarterly result.

The cost of services provided totaled R\$71.5 million in 1Q17, down 10.8% in the period. The reduced number of containers transported, besides higher efficiency of fuel consumption at railway operations, contributed to reduce variable costs by 23.0% to R\$20.4 million.

EBITDA from the Container Operation was a loss of R\$10.6 million in 1Q17. Despite the negative result, the 26% EBITDA growth year-on-year is mainly due to the rationalization of non-profitable routes and cost savings.

Note 8: Third-party freight costs include contracts for road and rail freights with other operators

Variable costs totaled R\$278.3 million, down 11.6% from 1Q16. Fuel expenses fell 8.8% in 1Q17, due to higher efficiency of new locomotives acquired. In addition, expenses with transportation through other rail lines and trucks decreased by 21.0%.

Fixed costs totaled R\$652.6 million, up 17.3% from 1Q16. Personnel expenses climbed 24.0%, mainly impacted by reversal of provision for variable compensation in 1Q16, besides the collective bargaining agreement applied in the period. In addition, maintenance expenses decreased, due to the fleet renovation plan, which requires a lower level of maintenance. The operational leasing also dropped due to devolution of locomotives during 2016. Also, depreciation and amortization were up 8.8%, due to the capitalization of investments made over the past years. Excluding depreciation and amortization, fixed costs increased 4.5%.

Note 9: It includes interest rates, foreign exchange variation, monetary variation, net result from derivatives and other debt charges

The financial result in 1Q17 was a net expense of R\$451.4 million, up 4.8% from 1Q16. Gross bank debt cost was up 18.8% to R\$291.4 million in 1Q17, due to the marginal increase both of cost and the average balance of debts in the period, and mainly due to the debt reschedule process concluded in 2Q16. Charges over leasing and real estate receivables certificates recorded a significant drop due to the amortizations occurred in these instruments, without new relevant funding. Such increase in the broad gross debt cost was offset by financial investments yields due to higher cash position. Monetary variation on lease and concession agreements reflects the adjustment (SELIC) of the unpaid concession amounts of West and Paulista Networks, which are currently under litigation. The 33.4% decrease recorded under interest rates on contingencies and contracts mainly refers to the drop of inflation adjustment indexes of provisions for contingencies, added to the drop in the balances of contingencies in such period. Other financial expenses include costs with bank-issued guarantees, which increased due to the contract and renewal of letters of credit at a higher cost and other financial operations.

4. Loans and financing

Total broad gross debt at the end of 1Q17 was R\$12.3 billion, up 21.6% from 4Q16. Leverage came in line at 4.4x (broad net debt/EBITDA), considering EBITDA of R\$2.1 billion in the last 12 months. The 2.7% increase in the balance of broad net debt is mainly due to the execution of the Capex plan, which consumed part of the cash in the period. All the foreign currency denominated debt of Rumo is hedged for exchange variations.

Rumo is subject to certain restrictive covenants referring to the leverage level and debt service coverage, in a some of its contracts. Most restrictive provisions are verified at the year's end and refer to broad net debt. Broad net debt includes bank debts, debentures, leases, real estate receivables certificates and derivatives linked to credit operations, less marketable securities and cash and cash equivalents. For December 31, 2017, the covenants were defined for a maximum leverage of 4.3 times (broad net debt /EBITDA LTM) and minimum interest rate coverage index of 1.4 times EBITDA/Financial Result.

Note 13: During 1Q16, 332 HPT freight cars and information technology equipment were acquired through operations characterized as financial leasing totaling R\$121.1 million. Considering these non-cash effects, the Expansion CAPEX came to R\$258.0 million in 1Q16.

7. Operating and Financial Performance Indicators

Below are the changes in the main operating and financial indicators.

Operational and Financial Performance Indicators	1Q16	2Q16	3Q16	4Q16	1Q17	1Q17	1Q16	Chg. %
Consolidated								
Unitary Rail Variable Cost (R\$/'000 TKU) ¹⁴	(20.1)	(19.6)	(18.9)	(21.1)	(19.0)	(19.0)	(20.1)	-6%
Unitary Fixed Cost + SG&A excluding depreciation (R\$/'000 TKU)	(42.9)	(41.0)	(37.4)	(57.7)	(42.7)	(42.7)	(42.9)	-1%

Diesel Consumption (Liters/ '000 GTK)	4.8	4.8	4.6	4.9	4.6	4.6	4.8	-4%
North Operation								
Grains from Rondonópolis (MT) to Port of Santos (SP)								
Average number freight cars loaded per day (units)	395	361	352	97	369	368	395	-7%
Transit time (hours)	100.2	101.4	105.6	96.7	107.1	107	100.2	7%
Cycle time of freight cars (days)	10.8	10.4	9.9	11.0	10.2	10.2	10.8	-5%
South Operation								
Grains from terminals in north of Paraná to port of Paranaguá (PR)								
Average number freight cars loaded per day (units)	355	352	175	36	277	277	355	-22%
Transit time (hours)	49.3	46.1	45.9	47.6	57.9	57.9	49.3	17%
Cycle time of freight cars (days)	8.4	7.4	7.7	7.8	7.6	7.6	8.4	-9%

Note 14: Considers only the variable costs of rail operations, excluding third party freight costs.

Note 15: The Operating Ratio calculation considers proportional allocation of part of the 4Q16 depreciation in the previous quarters of the same year.

Unitary Rail Variable Cost: The 11% decrease reflects the Company's higher efficiency assets, especially new locomotives' lower fuel consumption.

Unitary Fixed Cost + SG&A excluding Depreciation: The 1% drop is a result of fixed costs reductions achieved in 2016, partially offset by inflation in the period.

Operating Ratio: The ratio, which represents the portion of operating costs and expenses as a percentage of net revenue, improved year-on-year mainly due to Rumo's cost-saving efforts compared to 1Q16.

Diesel consumption: The 4% improvement in this index is a result of lower unitary diesel consumption of locomotives included in the operation, as well as lower sugar transportation in the North Operation, since the route of such commodity shows higher average diesel consumption/RTK, when compared to grains from Rondonópolis (MT).

Cycle time of freight cars: Reduced time of rail cars loading and unloading, resulting from better operation at terminals, caused an optimization of the cycle time of rail cars in the North and South operations.

Transit time: The index was affected by interruptions in the rail line for works in stretches of North and South operations, scheduled due to the expectation of lower volumes in this quarter in relation to the next periods

Rail cars loaded/day: The ratio reflects lower volume of grains transported in the quarter when compared to 1Q16, when Rumo carried an atypical corn volume in January due to record 2014/2015 crop. In addition, as a result of the fleet renewal process, railcars with a capacity of 50 tons were replaced by railcars with a capacity of 90 tons, allowing the same volume to be transported with fewer loaded railcars.
