

EARNINGS RELEASE 2Q18

Curitiba, August 7, 2018 – RUMO S.A. (B3: RAIL3) (“Rumo”) and COSAN LOGÍSTICA S.A. (B3: RLOG3) (“Cosan Logística”) today announced their results for the second quarter of 2018 (2Q18) composed of April, May, and June. The results are consolidated in accordance with the accounting criteria adopted in Brazil and International Financial Reporting Standards (IFRS). The comparisons included in this report consider 2Q18 and 2Q17 unless otherwise indicated.

Rumo 2Q18 and 6M18 Highlights

- In 2Q18, EBITDA totaled R\$844 million, 15% higher than 2Q17. EBITDA margin grew by 2 p.p. to 51%. In 6M18, EBITDA advanced 22% to R\$1,494 million, with a margin of 49%, 4 p.p. higher than in 6M17.
- Total transported volume reached 13.5 billion RTK, 9% higher than in 2Q17. In 6M18, total transported volume grew 13% to 25.3 billion RTK. May volumes were negatively impacted by the truck drivers’ strike. In April and June, transported volumes rose more than 15%, when compared to last year.
- Loading volumes in Rumo’s terminals at the Port of Santos (SP) dropped 21% in 2Q18 year-over-year and 12% in 6M18, totaling 5.1 million tons. This result mainly reflected the negative macro environment for sugar trade.
- Capex totaled R\$559 million in 2Q18, while in 6M18, capex came to R\$1,042 million, in line with the Company’s investment plan, with a highlight to the investments in truck dumpers that increase significantly the capacity of the Rondonópolis (MT) terminal.

1. 2Q18 Executive Summary

Rumo's EBITDA reached R\$843.7 million in 2Q18, up 15% year-over-year. In 6M18, EBITDA advanced 22% to R\$1.5 billion. The results were bolstered by higher transported volumes and greater cost efficiency. In 2Q18, fuel consumption decreased (Liters/GTK: -7%) and fixed costs were diluted, contributing to 2 p.p. margin expansion, to 51% in the period.

Volume transported by Rumo reached 13.5 billion RTK in 2Q18, up 9% year-over-year. In 6M18, volume transported totaled 25.3 billion RTK, up 13% versus 6M17. The quarter started with strong demand for soybean transportation and capacity, which drove 15% growth in April volumes. In May, the first 20 days of the month mirrored April's performance, however, over the last 10 days of the month, with the truck drivers' strike, the Company was impacted especially in its grain operation in the state of Mato Grosso. In June, with the end of the strike, demand and operation got back to normal, recording growth of 16% in transported volumes in front of last year. In addition, it is worth mentioning that fertilizer operation in Rondonópolis (MT) initiated activities this quarter, which is strictly within the volumes planned for the year.

Source: Rumo System

In 2Q18, Rumo reached a market share of 43% in the transportation of grains to the Port of Santos (SP), 2 p.p. lower than in 2Q17. Both exports volume and transported volumes by Rumo were impacted by the truck drivers' strike in May. However, excluding the strike period, Rumo's volume was constrained by capacity, which was lower than market expansion during some periods of the quarter, resulting market share loss. The South Operation increased 6 p.p. market share of grains at the ports of Paranaguá (PR), and São Francisco do Sul (SC), due to more available capacity for grains, as long as sugar market was not favorable. Additionally, our commercial effort to bring more grains demand, improvements in operational safety, access to better port terminals, together with investments delivered 37% growth in transported volumes.

In 2Q18, Rumo maintained its indebtedness ratio at 2.6x broad net debt/EBITDA, making prepayments on certain instruments, reducing its gross debt balance from R\$12.1 billion to R\$10.9 billion. This quarter, the financial result recorded relevant non-recurring effects: (i) marked-to-market of Senior Notes hedging instruments (swap for CDI interest rate) as a result of interest forward curve fluctuation, which impacted results by R\$80 million, but a non-cash effect; (ii) recognition of approximately R\$22 million non-cash expenses referring to the *Debenture* issued in 2016, which previously would be deferred over the debt useful life, and due to prepayment, were recognized in advance; and (iii) prepayment fees of this *Debenture* totaling R\$16 million (cash effect).

The outlook for 2018 grains crops remains positive for Rumo. Agroconsult revised estimates for the 2017/2018 soybean crop relative to the previous crop, increasing production projections in Brazil and the state of Mato Grosso to 4% growth, which would make this a record crop. For the 2017/2018 corn crop, estimates indicate a 17% decline in Brazilian production and a 10% drop in Mato Grosso production. Positive conditions for soybean trade extended its exports period, which coupled with corn carryover inventories contributed to offset the lower grain production, already expected for the second half.

In addition, there is a trend of increase in average road freight prices when compared to 2017, which is evidenced by IMEA figures, enhancing Rumo’s competitiveness.

In 2Q18, total volume transported by the North Operation was 9% higher than in 2Q17. In 6M18, the increase was up 13% in front of 6M17, reaching 17 billion RTK. There was a significant increase in soybean volume, mainly reflecting capacity gains which allowed Rumo to capture higher volumes in April and June, more than offsetting the drop in grains origination that occurred in May, due to the truck drivers' strike. The fertilizer operation which initiated its activities in early April, also contributed to results and remains on schedule. Concerning industrial products, Fibria's new operation to transport pulp was again a highlight. In addition, increased transportation of biodiesel and ethanol drove higher fuel volumes in 2Q18. Port loading volume reflected reduced sugar exports versus 2Q17, even this, Rumo's market share increased 6 pp in sugar transportation to the Port of Santos (SP). Additionally, the entry of a new port terminal impacted demand for all terminals.

EBITDA reached R\$726 million in 2Q18, up 13% from 2Q17. In 6M18, EBITDA grew by 18% to R\$1.3 billion year-over-year. Variable cost increased due to volume growth and diesel average-price increase (R\$/Liter +25%), partially offset by higher energy efficiency (Liter/GTK -7%). Fixed costs were in line with 2Q17. EBITDA margin reached 60%, 2 p.p. higher than in 2Q17, an effect of cost dilution in the quarter.

In 2Q18, the South Operation's transported volume was 8% higher than in 2Q17. In 6M18, the increase was 12% year-over-year. As with North Operation, capex investment enabled a significant increase in soybean transportation, resulting in 6 p.p. growth of Rumo's market share of grains transportation to the ports of Paranaguá (PR) and São Francisco do Sul (SC). Lower sugar volume transported in the quarter mainly reflected a sugar/ethanol ratio more favorable to the latter. In the transportation of industrial products, fuel volume increased, mainly driven by higher demand for transportation of biodiesel and ethanol.

Note ⁵: Includes revenue from volumes contracted but not executed according to commercial agreements ("take or pay").

The South Operation's EBITDA came to R\$116 million in 2Q18, up 22% from 2Q17. In 6M18, EBITDA climbed 54% to R\$151 million. Net revenue growth in the quarter was bolstered by higher transported volumes and 9% increase in the average yield. The variable cost increases due to higher transported volumes and higher diesel average price (R\$/Liter +25%), but it was mitigated by lower fuel consumption (Liters/GTK: -7%). Fixed costs increased mainly due to the recognition of R\$24 million of tax credits in 2Q17. Thus, operation reached 30% of EBITDA margin in the quarter, a relevant expansion when we exclude the tax credits from the 2Q17 basis.

Volume of transported containers totaled 16.2 thousand containers in 2Q18, 6% higher than in 2Q17. In 6M18, volume of transported containers grew by 3% to 29.8 thousand containers. The Company's strategy of diversifying cargo and servicing routes with higher average distance allowed increased average yield and RTK total volume.

EBITDA from Container Operations was R\$1.9 million in 2Q18. In 6M18, EBITDA was a loss of R\$5.4 million, a 68% improvement compared to 6M17. The qualification of operations enabled net revenue increase. Variable cost increased due to transported volumes increase, which resulted in higher expenses for truck freights to the terminals. Diesel average-price increase also impacted results in the period. Highest operational efficiency allowed the significantly reduce in fixed costs, which were diluted by the 23% volume growth in RTK.

(363.8)	(298.8)	21.8%	Depreciation and Amortization	(692.9)	(586.2)	18.2%

Note⁷: Own logistics costs include sand, right of way, terminals, and other variable costs.

Note⁸: Third-party freight costs include contracts for road and railway freights with other operators.

Variable costs totaled R\$386.5 million in 2Q18, up 14.7% from 2Q17. Higher transported volume (+9%) in the quarter drove the increase. The 25% increase in average diesel price was partially offset by efficiency gains in locomotives' consumption (Liters /GTK: -7%). Likewise, in the North Operation, higher grain volumes transported contributed to increase own logistics costs. Third-party freight costs decreased due to lower sugar volume transported by truck freights and other railways.

Fixed costs totaled R\$366.1 million in 2Q18, 3.6% higher than in 2Q17. This result reinforces the Company's operational leverage and cost dilution strategy. Maintenance cost reduction was due to lower corrective maintenance expenses (lower preventive maintenance cost classified as Capex). Operating lease expenses significantly decreased due to refund/acquisition of rolling stock. Also, the recognition of tax credits (R\$24.3 million) in 2Q17 contributed to increasing other operating expenses in 2Q18. In addition, costs due to depreciation and amortization increased due to the investments made in 2017.

Note⁹: Includes interest rates, foreign exchange variation, net result from derivatives and other debt charges.

The financial result in 2Q18 was a net expense of R\$459.7 million, 6.2% higher from 2Q17. The debt cost suffered a non-recurring impact (i) of marked-to-market of derivatives hedging Senior Notes (swap for CDI interest rate), due to interest forward curve fluctuation (which impacted results by R\$80 million, but a non-cash effect); (ii) recognition of approximately R\$22 million non-cash expenses referring to the Debenture issued in 2016, which previously would be deferred over the debt useful life, and due to prepayment had to be recognized in advance and (iii) the prepayment fees of this Debenture (R\$16 million, cash effect). Leasing charges and real estate receivables certificate tumbled due to the amortization of these instruments, without new funding. Financial investment yield declined 32.5% due to CDI interest rate drop quarter-over-quarter. Monetary variation on leasing and concession agreements reflects the adjustment (SELIC) to the unpaid concession amounts of the West and Paulista Networks, which are currently under litigation. Other financial expenses include costs with bank-issued guarantees and other financial operations.

Note¹¹: North Network enjoys the Amazon Development Office (SUDAM) benefit that entitles it to a 75% reduction in corporate income tax (rate of 25%) until 2023.

4. Loans and Financing

Broad gross debt at the end of 2Q18 was R\$10.9 billion, 10.0% lower than 1Q18 and down 9.8% year-over-year. Leverage remained at 2.6x (broad net debt/EBITDA), considering EBITDA of R\$3.0 billion over the last 12 months. The balance of broad net debt came to R\$7.7 billion, 3.8% higher than 1Q18 and 16.4% lower than 2Q17.

Rumo is subject to certain restrictive covenants referring to its leverage level and debt service coverage in a few of its contracts. Most restrictive provisions are verified at year end and refer to broad net debt. Broad net debt includes bank debts, debentures, leases, real estate receivables certificates, and derivatives linked to credit operations, less marketable securities and cash and cash equivalents. For December 31, 2018, the covenants were defined for maximum leverage of 4.0x (broad net debt /LTM EBITDA) and minimum interest rate coverage index of 1.4 times EBITDA/Financial Result.

Note¹³: it includes the amount of R\$3.0 million referring to the acquisition of materials/services, with disbursement in 3Q18.

In 2Q18, capex totaled R\$559.1 million, up 16.8% from 2Q17. In 6M18, capex increased 9.7% to R\$1,043 million. Recurring capex came to R\$206.4 million, in line with the guidance projected for 2018 and 7% above 2Q17. Expansion capex totaled R\$352.3 million. In 2Q18, the main investments in capacity expansion were: (i) infrastructure improvement to remove restrictions and increase capacity; (ii) upgrade of permanent way, by replacing tracks and sleepers; (iii) acquisition of 106 HPT railcars and 6 AC44 locomotives; (iv) several improvements in rail yards and terminals, aimed at optimizing the train dwell time and increasing operational productivity.

Cycle of railcars – Grains from North PR – Ports PR/SC	7.3	7.5	2.7%	7.0	7.4	5.7%

Operating Ratio: This index, which represents the portion of costs and expenses as a percentage of net revenue, was in line with 2Q17, reflecting higher yields and reduction in fixed and variable costs (unitary), being compensated by depreciation increase, which occurs due to higher investment levels.

Diesel Consumption: The 7% improvement in this index reflects the higher efficiency in unitary diesel consumption of new locomotives included in the operation. In addition, higher volume of grains transported in the North Operation contributed to this result, since this commodity route has lower average diesel consumption (liters/GTK).

Rail accidents: This index, which measures the number of accidents per million kilometers, improved 6% versus 2Q17. In 6M18, the Company reduced the number of rail accidents against the same period last year, thereby generating greater operational efficiency.

Personal accidents: This index, which measures the number of accidents which required leave, improved 16% in 2Q18 vs. 2Q17. Rumo maintains its commitment to safe operations, in line with international railways benchmarks.

Transported volume: The total volume transported in the North and South Operations increased, mainly as a result of higher capacity generated through investments made by the Company.

Cycle time of railcars: This index was particularly affected in 2Q18 mainly due to effects of the truck drivers' strike.

8. Guidance

This section contains the guidance ranges for some of the key parameters that will influence Rumo's consolidated results for 2018.
